Business Highlights

“We are pleased to report consistent quarterly performance. Total revenue for the quarter stood at Rs. 192.4 Cr, a growth of 40.22% on YoY basis. We continue to see interest in our product offerings globally. This quarter your company received its environmental clearance for its greenfield project at Pakhajan, Gujarat. Civil activities at the site have started and we intend to commence production in Q4FY24.

Due to global macroeconomic headwinds we see some volatility in raw material and finished product prices. Despite this, your company is doing its best to sustain the current sales momentum through better product mix and making efficient use of our multi-purpose facilities.

As we wait to commence production at our new Pakhajan site, we continue to improve our product mix and offerings from our existing facilities which are operating at full capacity. Our sustained investments in R&D and process development have resulted in consistent growth in our EBITDA margins over the last few quarters. This has been possible on account of new product offerings and improved process economics. We are confident to grow the company from a medium to long term timeframe and continue to take steps that result in increasing shareholder wealth.”
